

Hope > Covid Project

The Covid pandemic has left a collective loss and trauma for everyone around the world. While it has left many in despair there are some who found themselves to be at a greater disadvantage than others. They are the families who have lost their primary or only earning member in the family due to the Covid Pandemic. The women in these families are now faced with the harsh reality of coming to terms with being the sole providers for the family. For these women and their families, getting back to a sense of normalcy is so far long and sometimes may seem impossible. Many of these women who lost their husbands due to the pandemic are now forced to find employment while looking after their family all on their own.

The “Covid Relief Adopt A Family” Program is a program aimed to help women who are now widows because of the COVID pandemic. They have lost their husbands who have been the main breadwinner and the main source of income for the family. The program is aimed to help families financially through a period of one year until the wife/mother can get back on her feet to help her family financially. Many women are now left with the sole responsibility of looking after their children's Nutrition, Education, and for running the household on a daily basis. The adopt family program is aimed to help these widows get back on their feet regardless of the circumstances they're in.

You will be supporting a family of your choice through a monthly donation of \$50 for a period of 12 months that will enable them to carry on in their life until they become stable to help themselves. Most of these women have not had any experience working all their life. They have been at home caring for their children and are now faced with the reality of working to find income while caring for their family. This donation can be of help to them to ease their burden while they get their feet back on the ground.

How can your donation help?

- It may help a mother to put food on the table until she finds a sustainable job.
- It may help a mother to start a business to sustain her family.
- It may help a mother support her children's education until she's able to support them as she recovers financially.

The program is aimed only for one year, after which our hope is to help these women get back into employment. We will be working with them to help them start a business or help them look for places of employment through the one-year program.

How it works

So how can you become a partner to do adopt a family? You can sign up with us and we will have a discussion with you and based on the information given to you, you may choose the family you want to adopt to help. To sign up please fill the form: <https://forms.gle/g6wvkYXYzpU5v1WW7>
